

Found My Place

Pete Murray

Life is a long winding road
And there'll be many road blocks ahead
And you will stumble and you will fall
Just hold steady on every word I've said

There'll be hard nights, cold times and heartache
Don't ever let your dreams die or fade
The further away from each other
The louder I hear you say

Young is your feel
Love is your grace
Hope is aware
Only time makes you wait

Know who you are
Just know who you are
Trust that your compass won't lead you astray
Just know that home is your heart
And your heart's where I found my place
Your heart's where I found my place

Love is a free-flowing river
It spreads like streams that run through our veins
It can make you and break you, fix you and shape you
As sure as the sun and the rain

Young is your feel
Love is your grace
Hope is aware
Only time makes you wait

Know who you are
Just know who you are
Trust that your compass won't lead you astray
Just know that home is your heart
And your heart's where I found my place
Your heart's where I found my place
