

## The Fall Apart

Pete Murray

Just a half moon silhouette on your face  
Street life glimmer hope lost in space  
It was like I was slipping on frozen time  
All I know is I want-a be right beside you

We fell apart and were falling down  
I had to get my feet back on the ground  
Learn to walk and to talk around my confusion

So don't let me down now  
Or throw it all away  
Don't burn our hope out  
Let's take this it all the way  
Oh, the night  
Please, throw me a bone  
Cause it's lonely right, lonely right now if we do this alone

We can bounce back brand new together  
But starting now we can make it forever  
Sometimes I feel I'm on borrowed time  
Don't want to wait now to make you mine again

We fell apart and were falling down  
I had to get my feet back on the ground  
Learn to walk and to talk around my confusion

So don't let me down now  
Or throw it all away  
Don't burn our hope out  
Let's take it all the way  
Oh, the night  
Please, throw me a bone  
Cause it's lonely right, lonely right now if we do this alone  
Cause it's lonely right, lonely right now if we do this alone  
...
