

With Only You

Pete Murray

I saw everything I wanted to see
When your face turned around
Your eyes were brown, your hair was dark
Is for your feet when you're on the ground
You kissed my cheek, you held my hand
Then you walked out of my town
And as you walked away, I looked for the words
But no words could be found
Could be found, could be found, could be found

All I want is to be with only you today, this way

I was everything I wanted to be
When I held you in my arms
I held you tight, I kept you warm
You were always by my side
And as I watched you walk, you looked so good
You always blew my mind
When I think of you, days are calm
And I want you by my side
By my side, by my side, by my side

All I want is to be with only you today, this way
All I want is to be with only you today, this way
