

Call the Doctor

Peter Andre

She was my girl, my closest friend, my honey
Type of girl that'd go hard for me
She'd be kicking back, kinda girl who don't pretend
And you could always catch her hanging with my friends
This girl was all I ever needed
What will I do now that I'm leaving?
It hurts bad 'cos I was true to her
I'm regretting having anything to do with her

Now my hearts racing, I'm burning up and I'm pacing
She was my missus in the making
Watched her throw it all away
Now my minds playing tricks on me saying that I need her
It's much too late I've got to leave her
No words left in me to say

Somebody call me a doctor
This is an emergency; my lady's stepping out on me
My heart's stopped beating and now it's getting hard to breath
Somebody call me a doctor
This is an emergency; my baby's stepping out on me
My heart's stopped beating it's getting a little hard to breath

Oh, I never saw this coming
Had me fooled yeah she really had me going
I saw her at the Beverly centre, with another dude;
Man she thinks she's clever
When she said she was out with her friends
I saw her talking and holding his hand
I guess it's like a kick in the face
What did I ever do for you to treat me this way?

Now my hearts racing, I'm burning up and I'm pacing
She was my missus in the making
Watched her throw it all away
Now my minds playing tricks on me saying that I need her
It's much too late I've got to leave her
No words left in me to say

Somebody call me a doctor
This is an emergency; my lady's stepping out on me
My heart's stopped beating and now it's getting hard to breath
Somebody call me a doctor
This is an emergency; my baby's stepping out on me
My heart's stopped beating it's getting a little hard to breath

I guess I gotta just walk away
The doctor said there ain't no medication for my pain
So I'm done baby I'm gone
I guess I gotta just walk away
'Cos there's nothing that could take away the pain
So I'm gone baby

Somebody call me a doctor
This is an emergency; my lady's stepping out on me
My heart's stopped beating and now it's getting hard to breath
Somebody call me a doctor

This is an emergency; my baby's stepping out on me
My heart's stopped beating it's getting a little hard to breath
