

## Cry in Public

Peter Andre

I was hoping these days they would last forever

I've never been afraid to cry in public  
No I've never been afraid till now  
I was hoping these days, they would last forever  
But till forever comes, let the tears fall down

Call me naive there's no way I believed this would happen  
If it weren't for my shadow, I'd be alone  
All the beauty you've brought, that we fought for has vanished  
Selfishness opened the door for you to leave  
And then let in the cold

I've never been afraid to cry in public  
No I've never been afraid till now  
I was hoping these days, they would last forever  
But till forever comes, let the tears fall down

I may have fell and I crawled but I never abandon  
We saw our fairytail end with a broken crown  
Tears waiting for time to shine in my reflection  
Thought I saw your face in the crowd  
But it was only a clown

No I've never been afraid to cry in public  
No I've never been afraid till now  
I was hoping these days, they would last forever  
But till forever comes, let the tears fall down

You said a real man would never leave  
But I tried to fix our broken dreams  
You always wanted me to be like my father  
Isn't it ironic  
I'll show you what it is to be brave  
Running from a price unpaid  
I ain't scared and I've paved my own way

Now I've never been afraid to cry in public  
No I've never been afraid till now  
I was hoping these days, they would last forever  
But till forever comes, let the tears fall down
