

It's Gonna Be Me

Peter Green

when the night time music is right, you can hear him
moving around
like a horse that bolts in the night, you will feel it
shaking the ground
and when the night is in your eyes, you will see things
that you've never seen before
and a tall good looking stranger, will come walking
through your door
say it is me, it's going to be me
yes, little old me, just you wait and see
and you'll get down on your knees
yes, you will, yes, you will
and you're sitting there all alone, and all of your
friends have gone home
and you feel like you want to scream, but you can't
'cause you're caught in a dream
and when the night is in your eyes, you will see things
that you've never seen before
and a tall good looking stranger, will come walking
through your door
say it is me, yes, it's going to be me
yes, little old me, just you wait and see
and you'll get down on your knees
yes, you will, yes, you will
when you think of all that you did, how your jealous love
tore off the lid
and your cheating heart cheated too much, you can see me
now but you can't touch
