

A Love Divine

Peter Heppner

A love divine

Something no one takes away
A love all mine
In the most desperate of all times
It will demand
But won't be greedy
This love will stay
Not pass away

And if a storm should cross my way
Love will be right beside me
And in the coldest night
It leads me with its light
All through the dark
All through the silence
It will prevail
It must not fail

And if they do not understand
Let them talk about it
True love easily withstands
If they laugh about it
A love so strong that no one can deny
That it's meant to be
You and I

A love divine

One thing no one takes away
A love all mine
And if the coldness creeps into my heart again
Love's there to guide me
I'm not alone
It leads me home

And if they do not understand
Let them talk about it
True love easily withstands
If they laugh about it
A love so strong that no one can deny
That it's meant to be
You and I

A love divine

And if they do not understand
Let them talk about it
True love easily withstands
If they laugh about it
A love so strong that no one can deny
That it's meant to be
You and I

A love divine
