

# The World Goes Round

Peter Maffay

The world goes round and every day  
Another piece of our heaven seems to break away  
I've seen the people live in harmony  
But now it all seems like a dream  
And when I woke up and looked for a friend  
I realized that time had moved upstream  
The world goes round

The world goes round  
The years go by  
And no one dares to wonder  
Or to question why

There was a time when the Mother Nature  
Took from the Earth and gave it light  
But now that my brother has broken her freedom  
The day will fade to an endless night  
The world goes round

The world goes round and every day  
Another piece of our heaven seems to break away

Freedom, peace and understanding  
Is it really just a dream  
And the time runs by

The world goes round and every day  
Another piece of our heaven seems to break away  
The world goes round  
And the years go by  
And no one dares to question  
Or to wonder why
