

# Constellation

Petit Biscuit

Been wakin' up in a big bad blur  
Just recovered from my paranoia  
You're keepin' me away from the descent  
So all I want is to be loyal

We both facin' these big black skies  
I'm starin' at this constellation  
And our hearts are synchronized  
It's my only consolation

I'm fixin' memories to remember  
But once again I'm feelin' anxious  
The way you talkin' calms my temper  
You bring me back to my virtues

At midnight the explosion will happen  
I see you runnin' in slow motion  
On this race against the clock  
Like the stars in rotation

Still visualizin' you by my side even though  
There's a hundred light years between us  
I got so many questions unresolved  
This constellation makes me think about us

Still visualizin' you by my side even though  
There's a hundred light years between us  
I got so many questions unresolved  
This constellation makes me think about us
