

# Time Moves On

Phantom Planet

It's just the same day over and over  
I mean, seasons will change  
And we will get older  
Maybe it rains, or it's sunny weather  
But when it gets bad  
Maybe, it'll get better

As time moves on  
It's gonna change before too long, oh-oh-oh  
And the doors will keep revolving  
With everyone who's come and gone  
As time moves on

Let's sing a song for our future lovers  
A verse to get sick  
A chorus to recover  
I keep hearing this song in morning seizures  
It's heavy right now  
But it'll get easier

As time moves on  
We're gonna change before too long, oh-oh-oh  
All the hearts we held too tightly  
When the beat was wrong, well, they've come and gone  
As time moves on  
Time moves on

When we first met  
We'd already been severed  
Love is quick with goodbyes  
But with us forever

As time moves on (it's gonna keep on turning)  
It's all gonna change before too long, oh-oh-oh ([?])  
And the doors will keep revolving (already, already gone)  
With everyone who's come and gone  
As time (already) moves on (already gone)  
Yeah, it won't be long  
Till time (already) moves on (it's gonna keep on turnin')  
As time moves on

If it's time to move on from the old way  
Move on, come what may  
When it's time to move on from this tired day  
Move on, don't be afraid
