# This Can't Be Everything

**Phantoms**

I, I need to start living
Stop worryin' that I'm missing
My only chance to get by

I've been out here for ages
Tied up and complacent
Just sittin' on the side

But when's my time to leave?
My shot to break free
Free from your lies

I'm running endlessly
Will you come with me?
And leave them behind

There's so much more to see
This can't be everything

I, I'm wonderin' what you're thinking
You don't need their permission
To get back in line

They, they know just what they're doing
Keep us lost in the confusion
Not gonna change my mind

But when's my time to leave?
My shot to break free
Free from your lies

I'm running endlessly
Will you come with me?
And leave them behind

There's so much more to see
This can't be everything

There's so much more to see
This can't be everything

So why don't you just let them go and come with me
Remember that all we've known is fantasy
