

# There's Something Special

Pharrell Williams

There's something special on the other side of this moment  
And it's about what you and I decide  
And it's important for you to remember we did this together  
And finally, they'll know the story of our lives

I'm a sinner  
Sometimes I only did what was required  
I'm a sinner  
Sometimes I sat down when I got tired  
Should've stayed standing up  
To do the job for which I was hired  
But the good Lord  
Thank you for relighting my fire

Grab someone you love  
There's something special on the other side of this moment  
And it's about what you and I decide  
And it's important for you to remember we did this together  
And finally, they'll know the story of our lives

There's a brush fire  
TV's watching it escalate  
Smoke signals going up (read the signs)  
It'll take your breath away  
But they don't know how we act now  
We'll turn our tomorrow into yesterday  
Don't you nest away  
C'mon, get dressed ok

Grab someone you love  
There's something special on the other side of this moment  
And it's about what you and I decide  
And it's important for you to remember we did this together  
And finally, they'll know the story of our lives

And if it happens to rain on my plans  
Water and sweat will dry when they can  
Not even cuffs will prevent this man  
From the connection between these two hands  
You heard me?  
Yessir

And it's important for you to remember we did this together  
And finally, they'll know the story of our lives
