

# Electric Heights

Phidel

Electric heights  
I'm a dizzy spell away from getting close to you  
I was alive  
With the things I never really thought that you could do  
Can't compromise  
When I think about the chance I had to make it work  
I wanna die  
From the ways I never really thought that it'd hurt

But now I'm begging you for something that I thought I'd never want  
Tears me to the ground this is the apex of your hunt

I prayed, I'd have something that you'd still need  
I'd have something that you'd still want  
But now finding you gone, I see  
I was alive  
I was alive

But there were too many flags on the sand  
Too many eyes  
I never really thought that you would be my man  
Electric heights  
I'm a dizzy spell away from getting close to you  
I wanna die  
From the things I never really thought that you could do

Sight before sound, and I'm left there, oh  
Sight before sound, and I'm left there, oh

Begging you, needing to  
Begging you, needing to

I prayed I'd have something that you'd still need  
I'd have something that you'd still want  
Oh now finding you gone, I see  
I was alive  
I was alive

Electric heights, heights

Sight before sound and I'm left there  
Sight before sound and I'm left there, oh
