

Floods

Phidel

Through the years we've travelled you and me
Through the seasons solar systems
I've never kept such faithful company
I always knew you'd go the distance

Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you

You became a colour I could see
Flashing through each pure emotion
You became the mark of what it means
To say a prayer with pure devotion

Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you
Bring your flood to me, my friend I need you
