

Run On

Phildel

Takes love to build this machine
Joy to run on
Ignore the rules of history, boy
So come on
Don't need, a cure for this disease, though
My love's gone
Don't need, your old philosophies, no
To run on

Run on, like you live for something
Run on, like you're bound by nothing
Speed like the wind in the valley air
You would never know we were ever there
Run on, we're all chasing something
And the end day's coming
Free as a word sung without a care
Free as a word sung without a care...

Speed like the wind in the valley air
(Go!)
You would never know we were ever there
To run on
Takes faith
Free a a word sung without a care, born from the love of the open air
To be strong, when your love has gone...

Takes faith, to build this machine
When you're alone
I'll build my own technology and I'll fly home
Don't need a map for this journey
Or, a starry night, I'll be my own best company
And, I'll be alright...

When the rain starts falling, and the sky starts calling
So run on, come on...

Speed like the wind in the valley air
You would never know we were ever there
To run on
Free as a word sung without a care
Born from the love of the open air
Speed like the wind in the valley air
You would never know we were ever there
Run on, run on
Free as a word sung without a care
Born from the love of the open air...

Speed like the wind in the valley air
You would never know we were ever there
Speed like the wind in the valley air
You would never know we were ever there
