

# Can't Go Wrong

Phillip Phillips

I've seen the lights come from the flashes in the dark  
I feel like a blind man trying to make a start  
And I don't know, no I don't know  
Where I'm gonna go

I've seen the sun come up a mile from the ground  
Flew back the other way and saw it go back down  
I know the days changed but always seem the same  
I'll take the best of what I can from my mistakes  
And now I know, now I know

I can't go wrong, as long as I remember where I'm from  
Hold my head up just to keep it clear  
I want a chance just to face my fear, face my fear

Nevermind all the times I just couldn't wait  
I can't remember when it all began to change  
Watching the grass grow and die from summer to fall  
It's funny how the year passes by and you don't notice at all  
I know, I know

I can't go wrong, as long as I remember where I'm from  
Hold my head up just to keep it clear  
I want a chance just to face my fear, face my fear

I can't go wrong, as long as I remember where I'm from  
Hold my head up just to keep it clear  
I want a chance just to face my fear, face my fear

I can't go wrong, as long as I remember where I'm from  
Hold my head up just to keep it clear  
I want a chance just to face my fear, face my fear
