Get Up Get Down

Phillip Phillips

Get up, get down, get a little bit closer to the scene Find out what's there, something new to conceive Get up, get down, get a little bit closer to me Find out what's there what you can be

Yesterday was our time to turn back again And instead we went through the fire to get lost in sin Burn, baby, burn let me cool you down again Turn, baby, turn to see where it all begins

'Cause it's alright, it's out there Go and get lost, girl It's alright, I'm out there Let me take control

Get up, get down, move a little bit closer to the scene Find out what's there, something new to conceive Get up, get down, get a little bit closer to me, girl Find out what's there what you can be

Walk it off but keep it on Let it take control of every cell inside your body, Each and every bone Burn, baby, burn -- let's cool it down again Turn, baby, turn to see where it all begins

Yeah, it's alright, it's out there Go and get lost, girl It's alright, I'm out there Let me take control

Get up, get down, move a little bit closer to the scene Find out what's there, something new to conceive Get up, get down, get a little bit closer to me, girl Find out what's there what you can be

Na na na na na no Na na na na na no Na na na na na no

Get up, get down, just a little bit Get up, get down, just a little bit Get up, get down, let's get lost in this merry-go-round and round

Na na na na na no Na na na na na no Na na na na na no

Get up, get down, just a little bit Get up, get down, just a little bit Get up, get down, find out what's there, find out, baby, it's you and me

Get up, get down, move a little bit closer to the scene Find out what's there, something new to conceive Get up, get down, get a little bit closer to me, girl Find out what's there what you can be Get up, get down, move a little bit closer to the scene Find out what's there, something new to conceive Get up, get down, get a little bit closer to me, girl Find out what's there what you can be
