

So Will I

Phillip Phillips

Is this all you want?
Is this how it is?
Trying to love in armor
To save our skins

Do we need control?
Do we need these walls?
Come on let your guard down
Cause I want it all

And I've been keeping it all, keeping it all
Inside of me
You've been afraid of the fall
But if you want to fall just let me in

If you shine a light on the world you hide
I'll show you where my shadows lie
If you drag it all into the light, tonight
So will I

Pour my secrets out like water
Lay the pieces out before you
Drag it all into the light, tonight and so will I
And so will I

Even when I break
Even when you're crashing
We can both be broken in a torn up fashion

In the silence
Here in the dark, here in the dark
We can be
All that we really are
You really are
All I need

If you shine a light on the world you hide
I'll show you where my shadows lie
If you drag it all into the light, tonight
So will I

Pour my secrets out like water
Lay the pieces out before you
Drag it all into the light, tonight and so will I
And so will I
So will I

And I've been keeping it all, keeping it all
Inside of me
You've been afraid of the fall
But if you want to fall just let me in

If you shine a light on the world you hide
I'll show you where my shadows lie
If you drag it all into the light, tonight
So will I

Pour my secrets out like water
Lay the pieces out before you
Drag it all into the light, tonight and so will I
And so will I
So will I
So will I

So will I
