

# Thicket

Phillip Phillips

I didn't mean to let you down  
I grabbed for your hand but you took it back  
Trying hard not to let feelings show  
Will only hurt you in the future when the cracks in your skin s  
tart to show

Paint a picture of an apple in a tree  
Is that all that's there through the thicket of the leaves?  
Yes, yes now you see  
The bird flying out why don't you jump and see where he leads

Our love was just a dream, just a dream  
With all my heart I gave you everything, everything  
Oh and you know  
That it all goes around and round  
Cause you tumbled me down

Troubles seem to get to you  
Brush them off, they're only worries, push on through  
Hear the heart that beats for your soul  
He who has nothing, should not complain, we all have something  
of our own

Our love was just a dream, just a dream  
With all my heart I gave you everything, everything  
Oh and you know  
That it all goes around and round  
Cause you tumbled me down

Was it wrong what I did to get to you  
I felt I was the one to help pull you through  
And I know, I know it's alright  
I found a way out, I found a way out

Our love was just a dream, just a dream  
With all my heart I gave you everything, everything  
Oh and you know  
That it all goes around and round  
Cause it all goes around and round
