

Eternally Apart

Phinehas

Kindred of Infinity
Existing together
Eternally apart
Dispersed in the wailing wind
Separated at birth
Eternally apart
Clay surrounds hearts
Even thicker than the depth of the earth
Eternally apart

Endless bodies like the seas and the skies (Seas and the skies)
Are sooner to converge than you and I collide

We exist together while eternally apart
How vast the distance between who we are
Eternally apart

Bond severed, an impassable chasm
A mystery to man
Circling the universe in tandem
Just out of reach
Out of reach

Because we beat upon on a wall
Instead of the door
There is no answer
Are we destined to be on our own

Endless bodies like the seas and the skies
Are sooner to converge than you and I collide

Miles of night lay between twin stars (Endless bodies like the seas and the skies)
Are we only truly seen from afar (Are sooner to converge than you and I collide)

We exist together while eternally apart
How vast the distance between who we are
We exist together while eternally apart
How vast the distance between who we are
Eternally apart

Kindred of Infinity
We are, we are eternally apart
