

Human Nature

Phish

If we are complete the way that we are
Why'd I fall off my seat at the Moonrise bar
In a lovesick fog, attack of unease
See your cold stare, I'm brought down to my knees

Hey, yeah
Gotta get back to the let go
Hey, whoa
Whatever it takes to grow
Hey, yeah
Gotta get back to the get go
Get go, get go, get go
Gotta, gotta let go

It's all the vines up the rock I climb
It's just my human nature
Between the pines there's a light that shines
It's just my human nature

Paddle upstream on a hollowed out tree
With a whipped cream can and some vitamin C
No one's breaking my stride
Your love takes off and I watch it fly
Refracted back in our shared third eye
Relax and swallow my pride

Hey, yeah
Gotta get back to the let go
Hey, whoa
Whatever it takes to grow
Hey, yeah
Gotta get back to the get go
Get go, get go, get go
Gotta, gotta let go

It's all the vines up the rock I climb
It's just my human nature
Between the pines there's a light that shines
It's just my human nature

It's all the vines up the rock I climb
It's just my human nature
Between the pines there's a light that shines
It's just my human nature

Nature, nature
Nature
Nature
Nature
