Babe

Phlake

Look at me right in the eyes
I'm sick of being nothing but a ghost in the night air
We could be smiling pirates
We could give into this lovely virus like
Ey
Ey
Ey
Ey
Eh
We could be miles from fighting
But we keep pointing fingers why though?

You never call me babe
You never call me
You never call me babe
You never call me
You never call me names
You never call me
No you never call me babe
You never call me

Wiki leak all my flaws
Like how I don't send you any sweet emojis
No diggity I'm all about you
But your jealousy ain't gonna work as a vaccine
Okay
Okay
Okay
'Kay
Eh
But if you keep on saying pretty please
We gon' be stuck on this merry go round

Now my fingers bleed on my phone
Cause every message on fire
We sleep alone
Are we ever gonna thrive
I don't like to call you babe
Everytime I call you
Cause I don't want to be fake
When I call to talk to you
But you never ever call me babe
You never call me
No you never call me babe
You never call me
