

# I Could

Phlake

I could, I could

Pushing my buttons I'm going overboard  
Hands in my pocket reaching for antidotes  
Fists full of feelings no you don't wanna know  
What's on my mind and what I'm thinking right now  
We back and forth you know how it goes  
Been there before that part of the stories told  
If you're trying to rewrite it then I don't wanna know  
What's on your mind

Cause I don't wanna talk about it  
I'd rather stay in awkward silence  
What if we could keep it quiet  
I could, I could  
No I don't wanna talk about it  
We can find a way around it  
If we just could keep it quiet  
I could, I could

The sativa kicking in now  
I'm about to let my guard down  
All around I'm hearing new sounds  
It's so soft and clear in this atmosphere  
We can make the wrongs right  
Though we standing on a fine line  
How do we make sure it never back fire?  
We should stay in space float into place

We back and forth you know how it goes  
Been here before this part of the story's old  
Tryna rewrite it's been one hell of a show  
Leave it behind

Cause I don't wanna talk about it  
I'd rather stay in awkward silence  
What if we could keep it quiet  
I could, I could  
No I don't wanna talk about it  
We can find a way around it  
If we just could keep it quiet  
I could, I could, I could

Easy to say your fed up  
But what makes you so much better (ah fuck)  
It's clear in the rear view mirror  
That I could  
I could have played dumb and kept my mouth shut  
Pretended to have fun to watch it all rot  
But no one here won this marathon run  
Silence gon come but not like this hun

Cause I don't wanna talk about it  
I'd rather stay in awkward silence  
What if we could keep it quiet  
I could, I could, I could  
I could, I could, I could, I could

I could, I could, I could, I could
