

Wayside

Phoneboy

Tell me what you want
Tell me what you wanna say
Tell me that I'm wrong (Tell me that I'm wrong)
Dancing never felt that way
I try to play along
We're just another old cliché
You say you wanna talk (Do you wanna talk?)
Tell me that we both need space

And I would like to believe
That you were still coming over
That we're still getting closer
But that's when we were younger
That's when we were
Told...

Take me away from the wayside
Take me away from it all
Can I be by your side?
How can I make you call?
Take me away from the wayside
Take me away from it all
Can I be by your side?
How can I make you call?

We can take my car
Pick you up where we left off
We'll take it all apart (Take it all apart)
Pretend that it was no one's fault
We'll blame it on the stars
Cause Mercury's in retrograde
Or maybe it was Mars (Maybe it was Mars)
I can barely keep it straight

I would like to believe
That you were still coming over
And we're still getting closer
But that's when we were younger
That's when we were
Told...

Take me away from the wayside
Take me away from it all
Can I be by your side?
How can I make you call?
Take me away from the wayside
Take me away from it all
Can I be by your side?
How can I make you call?

(Can I make you call?)
(Can I make you call?)

You say that I'm not sorry
That's why you never come around
You say that I'm not sorry
That's why you never come around

You say that I'm not sorry
That's why you never come around
You say that I'm not sorry
That's why you never come around
