

## someThing about your love.

Phony Ppl

There's something about your love  
That I shouldn't publicly speak of  
These feelings were discovered because  
You're everything that made up my love

Curious wide awake  
But you're the only one in my dreams  
I believe we were meant to be

You said that you needed me  
Turns out you're deceiving me  
Practice what you preach is key  
You did what you had to do  
Possible reality is seeping through  
I'm just a millimeter from leavin' you  
It's so bad, but there's something about your love

There's something about your love  
There's something about your love  
There's something about your love

Curious wide awake  
But you're the only one in my dreams  
I believe we were meant to be

You said that you needed me  
Turns out you're deceiving me  
Practice what you preach is key, oh  
You did what you had to do  
Possible reality is seeping through  
I'm just a millimeter from leavin' your ass  
It's so bad, but there's something about your love

There's something about your love...
