

Make You Feel

Phora

Listen Long, long enough, you can love me
I'll be just yours, you can hold me
Even let you undress my mind
Save it, play it, watch it then press rewind
I can give you what you need, I can give you what you need

Yeah, I could give you what you need
Feel me in your arms, I ain't never gonna leave
I mean, I could turn your reality into a dream
And I bet that bitches hating, they never been with a king
So, close your eyes and just let it fade
All the drama and the lies you hear everyday
Let it go, lets take a ride, lets just get away
Listen to the music, free your mind girl, just let it play
Cause fucking with me baby its a different world
Yeah, I know you probably heard about it
And your friends told you the stories bout the list of girls
But its just me and you, so don't worry bout it
Give me your heart, I could fix that for you
And if you need relief, I could get that for you
Make you feel like a queen, you ain't gotta do a thing
Cause all I need is your love and I'mma get that from you
Yeah, I bet I'll make you scream for me
And I bet everything that you gon feel the need for me
Sing to me, this is everything you need
Let me show you what its like to feel loved, you don't need money
I'll be with you through the agony and ecstasy
And even though your home girls say you shouldn't mess with me
You never know, life is like a dice game
But I guarantee you baby, I could make your life change
Just

Breathe, breathe me in, taste my words, let me blow your mind
I will take you far, far away, I'll make you feel alright
You gotta crave it and chase it, until you're close enough to taste it
I can give you what you need, I can give you what you need

I'mma make you feel like you never have
Give you the love and affection that you never had
Cause I know you hate your moms and your pops left
And every time you think you found love, it just never lasts
Well I'mma make this last forever
Once you with me, I guarantee there's nothing better
I mean, our bond is unbreakable together
No matter what happens, no matter what weather
Every night, after work, I'm who you're coming to see
You can't get rid of me, I'm like a fucking disease
I mean, its like heaven huh? fucking with me
But everything comes with a cost girl, nothings for free
You can't live without me, feel the numbness in your body
I love when I'm with you with the functions in our bodies
When we all alone, I know you never letting go of me
And even if you have kids without me, they gon grow with me
There's always going to be part of me inside of you
That's why you always crawl back even when it fights you
I'll die for you girl, I know you'll do the same
You fell in love with me even before you knew my name

And being with me hurts, but you're used to pain
Yeah I know you feel the rush going through your veins
So she laid back, took a deep breath
And put that heroin inside until there was none left
She just

Breathe, breathe me in, taste my words, let me blow your mind
I will take you far, far away, I'll make you feel alright
You gotta crave it and chase it, until you're close enough to taste it
I can give you what you need, I can give you what you need
