

## We'll Be Here Soon

Phosphorescent

I know I'm back with just a song  
And I been gone so awful long  
But babe you know there ain't nothing wrong  
And you know I'll be here soon

The road is long and the road does wind  
I'm bound to leave some parts behind  
But don't you pay that any mind  
Cause you know  
I'll be here soon

So lay your ass out on the floor  
And raise your glass and raise it more  
And praise and laugh and praise some more  
And you know  
We'll be here soon

Now dry your eyes in the setting sun  
I know the pressure's on and ain't nothin' fun  
And babe you know it's all been done  
But you know  
It ain't been too

So get yourself and bring her here  
And fix yourself up in the mirror  
We'll fix ourselves another beer  
And you know  
We'll be here soon

And lay your ass out on the floor  
And raise your glass and raise it more  
We'll praise and laugh and praise some more  
And we will know.  
We will be here soon.
