

## Trial And Error

Phum Viphurit

Broken  
Little pieces of a heart  
Spoken  
Little lies tore us apart

You were lovely  
You couldn't keep away from harm  
I'm not lonely  
I just want you in my arms

Trust is trial and error  
Hold me, like I would hold you

Remember when you told me, our love will mend what's broken  
But then you put your faith in your fake friends  
Blurry nights and joy rides, oh the cheap thrills overcome  
Don't forget where you came from

Trust is trial and error  
Hold me, like I would hold you  
Run from this house of terror  
Far, where my love won't find you

Where did you go?  
My love, where did you go?

Trust is trial and error  
Hold me, like I would hold you  
Run from this house of terror  
Far, where my love won't find you
