

Thin Air

Pia Toscano

Love is like water
Pulling us underneath the waves
Filling our lungs up all the way
Love is like fire
Throwing our hearts into the flames
A burning desire we can't escape

And only heaven knows
When the rain will stop washing us away yeah
Cause we're suffocating
And in this perfect storm
Only we can fix the mess that we're making
Tears evaporating

We can stop the thunder
Burn up all the pain
Into thin air
Into thin air
We can heal the madness
Watch it disappear
Into thin air
Into thin air

Whoa whoa whoa
Into thin air
Whoa whoa whoa
Into thin air

The harder we battle
Beating our hearts against the wall
The faster we start to separate
But I won't surrender
Cause nobody else could break the fall
So I'll do whatever it takes

And only heaven knows
When the rain will stop washing us away yeah
Cause we're suffocating
And in this perfect storm
Only we can fix the mess that we're making
Tears evaporating

We can stop the thunder
Burn up all the pain
Into thin air
Into thin air
We can heal the madness
Watch it disappear
Into thin air
Into thin air

Whoa whoa whoa
Into thin air
Whoa whoa whoa
Into thin air

Into thin air

Love is like water
Pulling us underneath the waves
Filling our lungs up all the way
