

Levee

Pile

No pressure on the levee
With your prowess in physics
I don't wanna see the clouds that it leaves in its wake
Run back to all those things that look like home
Found with age the body breaks down
Without taste the body gives out

So how do I evaporate

Table burns on the other side of where you eat from
But the guts dried out and you only consume distraction

No way to get some sleep
With a fear of water
I was so calm and warm

So how do I evaporate

Cookie crisp
