

Look Around

Pillar

When I think about you Lord I just have to stop and say
Thank you for my life and for giving me this day
When I think about you Lord and everything you've made
All of the earth and all of creation, everything you've made

Look around at everything
Everything is made, Everything is made
Look around at everything
Everything is made, Everything is made

So many questions we have asked along the way
So many skeptical critics changing everything you've said
But I can't buy into those hopeless dreams
Of proving evolution, here's your solution:
Jesus is the way!

Look around at everything
Everything is made, Everything is made
Look around at everything
Everything is made, Everything is made

When I think about you Lord I just have to stop and say
Thank you for my life and for giving me this day
When I think about you Lord and everything you've made
All of the earth and all of creation, everything you've made

Look around at everything
Everything is made, Everything is made
Look around at everything
Everything is made, Everything is made

So many times in life we don't appreciate
All the things around we see is something that He made
One day I hope you wake up and you realize
It's not technological it's theological so open up your eyes

Look around at everything
Everything is made, Everything is made
Look around at everything
Everything is made, Everything is made

Look around (look around now)
Just look around (just look around)
Look around (look around now)
Look around
