

Evil Eye

Pilot

On and on till the early dawn
We would lie where the lovers were born
All night we would hold on tight
And keep our secrets warm

All around from the highest ground
I was lost in a dream of a kind
Evil eye, you were standing by
With trouble for my mind

Oh no, I can't let go
I stumble blindly for my goal
I would say I hope someday
That evil eye will be far away

I'm in the wrong and a right
I never lied but I might
Evil eye never showed me the light

All night we would hold on tight
And keep our secret warm

Oh no, I can't let go
I stumble blindly for my goal
I would say I hope someday
That evil eye will be far away

I'm in the wrong and a right
I never lied but I might
Evil eye never showed me the light

All night we would hold on tight
And keep our bodies warm

Oh no, I can't let go
I stumble blindly for my goal
I would say I hope someday
That evil eye will be far away

I'm in the wrong and a right
I never lied but I might
Evil eye never showed me the light

I was lost in your evil eye...
