

Maniac (Come Back)

Pilot

A simple complicated question and answer
Another undefined pack of lies, sir
But I love your eyes
They remind me of starry skies

You give me cardiac condition heartbreak
But when you rock and roll it makes me feel great
But I love your eyes
They remind me of starry skies

I never believed the life that you lead
I never could doubt that love would run out
Open your eyes you never did realise
Open your mind but look out from behind

Confessing lots of things that you couldn't make good
And talking lots of time to make your mind up
But I love your eyes
They remind me of starry skies

(Maniac come back)

(Maniac come back)

I never believed the life that you lead
I never could doubt that love would run out
Open your eyes you never did realise
Open your mind but look out from behind
