

Meet Me Now

Pilot

Let me tell you that
I need you
Standing by
When the sun is in the sky
Peace of mind and love
Is on your eye

Life is easy
When you're around
Nothing pulls me down
Was lost, but now I'm found

Meet me now
Meet me now
The sun is gently smiling through
Lift your head
And come along
There's things that we should do

Tell me now
Tell me all the things
That you have on your mind
We can stick together
And we won't get left behind

Let me tell you that
I need you
Standing 'round
You pick me off the ground
Was lost and now I'm found

Meet me now
Meet me now
The sun is gently smiling through
Lift your head
And come along
There's things that we should do

Tell me now
Tell me all the things
That you have on your mind
We can stick together
And we won't get left behind

Meet me now
Meet me now
The sun is gently smiling through
Lift your head
And come along
There's things that we should do
