

Love It Here

Pinkshift

Fuck your guns and fuck your violence
While we all bleed and you stay silent

End the war, turn off your stations
They feed us lies, it's on rotation
You believe in what you want to
But what you see will always haunt you

You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way
You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way

There's blood in the water, there's blood in the trees
And I know I have magic here, I feel what you fear
Add fuel to your fire to do what you please
You believe in what you see, but there's a world underneath
Say, "Fuck the police," they hate what I preach
Keep on moving forward with your heart on your sleeve
Believe in a dream 'cause the system is weak
The collective will always succeed

End the war, turn off your stations
They feed us lies, it's on rotation
You believe in what you want to
But what you see will always haunt you

You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way
You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way

You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way
You said that this was my fate
You said that I'd be okay
You said that this was the way
You said that this was the way

There's no peace until there's justice
They feed us lies, I won't be silenced
You believe in what you want to
But what you see will always haunt you
