

Dark into the Night

Pipes And Pints

As I walked through the damp city streets
on my way to see the show again
my mind is now wandering
haven't seen that much of you

Since that night when you left
with that suited city slick boy
life it has no colours or taste
for me at all
because

Girl you've changed my life
and pulled me out of the dark into the night
and girl you've changed my life
and pulled me out of the dark into the night
into this light

the dark to the night
ooo the dark to the night

When I walked through that old familiar door
and I left the night thoughts behind
sound of my punk rock family
and the noise took away my thoughts and my sorrows

Girl you've changed my life
and pulled me out of the dark into the night
and Girl you've changed my life
and pulled me out of the dark into the night
into this light

the dark to the night
ooo the dark to the night

As I sat with my boys nad brothers, sisters
and my extended progeny
I knew that's all right
to feel anymore pain

And I fought you from falling down
and I picked back up from your knees
oh darling I hear those songs
yes I hear those songs bleed

Girl you've changed my life
and pulled me out of the dark into the night
and Girl you've changed my life
and pulled me out of the dark into the night
into this light
