Can't Make This Over

Pixie Lott

I only miss you when you call
So please don't pick up the phone again
In the confusion of it all
Give me time
While my mind's unravelling

I just can't escape this feeling
But it's taking over me
All over me

I know now I can't try to hide it
It's clear to me that I can't fight it

You wanna take it back to where it was
But I can't make this over
I can't make this over
You want another chance to try again
But I can't make this over
I can't make this over
NOW

Don't say I don't miss the way we were
I thought nothing could tear us apart
Why do you have to sabotage our love
And leave me with a broken heart?

You think, that I won't forgive you
It's far beyond a breakup
Kiss and make up

I know now that it's not about you
I know that I can't live without you

You wanna take it back to where it was
But I can't make this over
I can't make this over
You want another chance to try again
But I can't make this over
I can't make this over

And now I'll follow my heart
And now you're out of my life
And now...

You wanna take it back to where it was
But I can't make this over
I can't make this over
You want another chance to try again
But I can't make this over
I can't make this over [x2]

NOW...
