Could You Be There?

Pixie Lott

You hurt me so bad, you know you did it, oh
And you found my heart right where I hid it, yeah
You say you've changed now, you say you're different
Isn't it strange how I wanna listen?

'Cause try as I might, as I may without you
I'll still cry every night, every day without you

Could you be there, could you be there with me?
In body and soul, complete, could you be there?
Could you be where I could see you only?
And swear you won't creep out on me and be there
Better be there 'cause I will not make the same mistake, oh, oh
I'd cry every night, every day without you

Don't want no sympathy love, you better save it, oh
And I don't ever wanna be your sentimental favourite, no
Your intention so hard to believe
Isn't the old you further on up your sleeve?

That try as I might, as I may without you
I'll still cry every night, every day without you

Could you be there, could you be there with me?
In body and soul, complete, could you be there?
Could you be where I could see you only?
And swear you won't sneak out on me and be there
Better be there 'cause I will not make the same mistake, oh, oh
I try as I might, as I may without you
I'll still cry every night, every day without you

Attention, don't call me "baby girl"
You know, you know, I know much better now
Probation, just call me "maybe girl"
You're gonna sweeten up the world
Like a cool Vanilla Swirl

Could you be there, could you be there with me?
In body and soul, complete, could you be there?
Could you be where I could see you only?
And swear you won't freak out on me and be there
Better be there 'cause I will not make the same mistake, oh, oh
Try as I might, as I may without you
I'll still cry every night, every day without you
