

# Further From Love

Pixie Lott

I just wanna let you know  
That you really hurt me this time  
Why you gotta use your voice  
Like a weapon  
And I don't wanna  
Rock the boat  
I just gotta pour  
My heart out  
Cause living in silence is deafening

Distance gives a small thing  
Big shadows  
When I'm on my own  
At night

Feels like we're slipping  
Tripping and falling  
Further from love (further from love and us)  
Further from us (further from love and us)  
Feels like we're running  
Rolling in circles  
Further from love (further from love and us)  
Further from us (further from love and us)  
I don't wanna say it  
But I've never felt  
Further from love

Picking up on little things  
Like how you made  
A subtle difference  
In all of the ways  
You're talking to me  
And now you  
Got me questioning  
Trying to find  
The something missing  
Cause staying  
On the same page  
Isn't easy

Distance gives a small thing  
Big shadows  
When I'm on my own  
At night

Feels like we're slipping  
Tripping and falling  
Further from love (further from love and us)  
Further from us (further from love and us)  
Feels like we're running  
Rolling in circles  
Further from love  
Further from us

And I just felt every mile crashing down on my heart  
Like the distance in between us trying to tear us apart  
And I read

Between the lines I make it up in my head  
What you said what you said

I don't wanna say it  
But I've never felt  
Further from love

Feels like we're slipping  
Tripping and falling  
Further from love (further from love and us)  
Further from us (further from love and us)  
Feels like we're running  
Rolling in circles  
Further from love (further from love and us)  
Further from us (further from love and us)  
I don't wanna say it  
But I've never felt  
Further from love
