

Live For The Moment

Pixie Lott

Talk about it, it's all we can do
Think about it, we cannot be moved
Just like a fire burning brighter than the stars
Oh it's in your heart

I can see you, baby, you see me
We don't ever, ever want to leave
It's like a fire, burning hotter than the sun
Gonna have me some fun

It's alright, it's so high up
We live the maze (we're so popular)
Not even trying, but now we're flying
Adrenaline has kicked in addicted to the weekend

Tempo has started, the problem now
Live for the moment (cause this time is ours)
Don't wanna stand there and watch the years go by
Live for the moment (to the day we die)
(To the day we die)

Come and follow, this is where it stands
Let the future and your hair go back
Like a fire burning brighter than the stars
And tear you apart

It's alright, it's so high up
We live the maze (we're so popular)
Not even trying, but now we're flying
Adrenaline has kicked in addicted to the weekend

Tempo has started, the problem now
Live for the moment (cause this time is ours)
Don't wanna stand there and watch the years go by
Live for the moment (to the day we die)

To the, to the day
To the, to the day we die
To the, to the day
To the, to the day we die

Live for the moment (cause this time is ours, ours, ours, ours, ours)
To the day we die

Tempo has started, the problem now
Live for the moment (cause this time is ours)
Don't wanna stand there and watch the years go by
Live for the moment (to the day we die)

Live for the moment (to the day we die)
Live for the moment (to the day we die)
Live for the moment (to the day we die)
Live for the moment (to the day we die)
