

Love You More

Pixie Lott

You said, when you were lying in my bed,
That you wanted something different right now
The next night, I rolled over to your side
Only to find you weren't around

After crying and tearing this room apart
After searching the streets checking where you are
I realized, you made the biggest mistake of your life

'Cause no one's gonna love you more than me
No one's gonna see in you what I see
Every little bit of my heart believes
No one's gonna love you more

How come it feels like I've lost my right arm?
And I can't even function right now
Would've lied, would've stole, would've died for you
Would've changed my last name if you asked me too
You realize, you made the biggest mistake of your life

'Cause no one's gonna love you more than me
No one's gonna see in you what I see
Every little bit of my heart believes
No one's gonna love you more

I will never be yours, but no one's gonna love you more

You can kiss every girl from New York to Japan
You can search the whole world, but you won't find the one
That holds you like I do, that loves you like I do
'Cause no one's gonna love you more

'Cause no one's gonna love you more than me
No one's gonna see in you what I see
Every little bit of my heart believes
No one's gonna love you more

No one's gonna love you more than me
No one's gonna see in you what I see
Every little bit of my heart believes
No one's gonna love you more

No one's gonna love you more than me
No one's gonna see in you what I see
Every little bit of my heart believes

I'll never be yours
No one's gonna love you more

No one's gonna give the way I do
No one's gonna stand the flaw, your truth
Never thought you'd break my heart in two

I'll never be yours

No one's gonna love you,
But no one's gonna love you more

No one's gonna love you more
