

What Now

Pixie Lott

I don't wanna lean on you
Even though you always lean on me
Coming from a place where
It ain't fair, and we ain't got much to lose
We've handled on a few things
Pulling on a few strings
Tying up the loosens on new friends

And I'd give you all of the rest of me
You're taking on all of the best of me, my love, my love
Me and you, we can't lose our chemistry
Don't let us just be a memory, my love, my love

'Cause when I close my eyes
You're the only thing that's playing on my mind
Though I don't want somebody new
What am I supposed to do, my love?
Tryna stood my head up
You're the one that I can't live without baby

What now baby? What now baby? What now baby?
You're the one that I can't live without baby
What now baby? What now baby? What now baby?
You're the one that I can't live without baby

I don't wanna think too much, no
But I remember when you had me your love, oh
We had a break, I went away
I didn't mean no love now
I can't explain it, my state is complicated
But you know, I know I kept it clear

And I'd give you all of the rest of me
You're taking on all of the best of me, my love, my love
Me and you, we can't lose our chemistry
Don't let us just be a memory, my love, my love

'Cause when I close my eyes
You're the only thing that's playing on my mind
Though I don't want somebody new
What am I supposed to do, my love?
Tryna stood my head up
You're the one that I can't live without baby

What now baby? What now baby? What now baby?
You're the one that I can't live without baby
What now baby? What now baby? What now baby?
You're the one that I can't live without baby
