

# Won't Forget You

Pixie Lott

I won't forget you

You've been on my mind  
We used to be so crazy  
A few years turned to five  
I haven't called you lately  
We left it behind us  
But one touch, reminds us  
And I know  
One touch, reminds us

Remember the sleepless nights?  
They could have last forever  
Remember the midnight drives?  
The feeling of now or never  
The good times, the bad times  
Tell me do you remember?  
All day, all night  
I won't forget you  
I won't forget you  
I won't forget you  
I won't forget you  
I won't forget you

Did too much, too young  
We used up all nine lives  
We never thought of home  
And I'm still holding on  
Whatcha want boy?  
Tell me whatcha want  
Shoulda thought, got to get that look in your eyes  
Driving slow, turning left to the passenger side  
And ask me when I...

Remember the sleepless nights? (sleepless nights)  
They could have last forever (they could have last)  
Remember the midnight drives? (the midnight drives)  
The feeling of now or never (girl)  
The good times, the bad times (the bad times)  
Tell me do you remember?  
All day, all night (all day, all night, hey girl)  
I won't forget you (I won't forget you)  
I won't forget you (I won't forget you, hey girl)  
I won't forget you (I won't forget you)  
The good times, the bad times (the bad times)  
Tell me do you remember?  
All day, all night (all day, all night, hey girl)

You could have never forget, you girl, you played a part  
You're right for me right from the start  
Good times and bad times, we've been through  
Look, you are the girl I'm still into  
I'm falling for you  
Girl, give me the mic and let me sing too  
My body is calling for you  
So I'm telling them that I won't forget you

I won't forget you  
The good times, the bad times  
Tell me do you remember?  
All day, all night  
I won't forget you
