

Bewitched

PIXY

Feeling that strange energy
Everytime you look at me
I get you're different, different
So sweet and dangerous
You told me you're gonna show me
The way to moonlight
I wanna know the night is long

As I close my eyes with your hands that I'm holding
Feeling alright on the clouds we are walking
I just keep falling
Take me far away from here
In that moment when I'm looking away and all eaten up
Swallowed

Bewitched
In your hunger in your hunger
Bewitched
Spreading faster spreading faster

There's not another explanation
I keep focus on you
I keep my focus on you
Take me into your lies
Swallowed

Under my skin you crawl
Smile with the pain, take me there
Darkness so bright, take me there
I keep focus on you
I keep my focus on you
Take me into your lies

Nothing else will get my attention
Seeing you I lost to temptation
Yeah you got me chained by my wings
Got me locked in your touch
And you know I'm addicted

Girls gotta situation, tied up in a chain and
See the beauty in the pain now invite me
Empty out my soul and I wanna be yours
I just want you to control
I don't wanna see you let me go

I'm not even afraid to burst into the flames
Hold me tighter than ever before
Let me follow your way
This is what I can take
And I'm getting eaten up
Swallowed

Bewitched
In your hunger in your hunger
Bewitched
Spreading faster spreading faster

There's not another explanation
I keep focus on you
I keep my focus on you
Take me into your lies

Got us captured in the dance of your mysterious fairies
Take us to a different paradise and fill us with life
Those hands got us stuck
Now we're trapped in your touch, here we come

We're the PIXY

Bewitched
In your hunger in your hunger
Bewitched
Spreading faster spreading faster

Let's draw me and you in this night
Come in closer, call me over to go inside
Swallowed

Under my skin you crawl
Smile with the pain, take me there
Darkness so bright, take me there
I keep focus on you
I keep my focus on you
Take me into your lies
