

Moonlight

PIXY

One, two, three

You're my baby
I can feel it's alright
Tell me softly oh
You can save me
When the sun comes down
Then we finally oh

Tell me now how you feel
Let me know what you see
I'll get you to the next level
Ridin' this night away you be my mirror
Ooh, it's time to do
You, just get into
The sun is going down and
I'll catch you be my light

When you touch me woo
I can't feel my legs
Let's go deeper instead
Turn me upside down and around

Dance with the moonlight
Dance with the moonlight
Dance with the moonlight
Watch me and your rhythm match up
Dance with the moonlight
Dance with the moonlight
Dance with the moonlight
Shadows in the night we don't stop oh

Baby swing me and drag me into this feeling
Through the night we don't stop oh
Like we're dreaming you pull me
So we can elevate dance with the moonlight

Naturally, watch me
Caught you looking I know (I know)
Just bring your mysteries no messing around
Come to me now

Let's dance above the moon
And it's been too long since you got me drunk off your touch
So could you not get me a ride
Baby don't back out

When you touch me woo
I can't feel my legs
Let's go deeper instead
Turn me upside down and around

Dance with the moonlight
Dance with the moonlight
Dance with the moonlight
Watch me and your rhythm match up
Dance with the moonlight

Dance with the moonlight
Dance with the moonlight
Shadows in the night we don't stop oh

Baby swing me and drag me into this feeling
Through the night we don't stop oh
Like we're dreaming you pull me
So we can elevate dance with the moon

We go up above the moon
Baby dream right by your move
Night is a party, do it like you do, hurry oh
Get into my lips you better hold me tight
Dance with the moonlight

Dance with the moonlight
Dance with the moonlight
Dance with the moonlight
Watch me and your rhythm match up
Dance with the moonlight
Dance with the moonlight
Dance with the moonlight
Shadows in the night we don't stop

You know you're too much
Keep stirrin' me, rough
Till the sun is up
Just dancing through the night we don't stop
And again we sync up
This feeling's not enough
Just might be the one
Baby dance with the moonlight
