Falling Star

Place Vendome

Days and nights pass by
The winter is soon over
But all you see is dark
Feel the weight on your shoulders

It's not too late, make a wish
A whisper to the sky
Let it out, let the world know what you want

You have always been a dreamer
Looking out your window
Hunting for the stars
You have always watched the sky
I will make it all come true
I will catch a falling star for you

A falling star for you

You fought your own wars
Ruled your own kingdom
But all you hear is silence
And the shadows coming closer

It's not too late, make a wish
A whisper to the sky
Let it out, let the world know what you want

You have always been a dreamer
Looking out your window
Hunting for the stars
You have always watched the sky
I will make it all come true
I will catch a falling star for you
