

# Fuck U

Placebo

There's a look on your face I would like to knock out  
See the sin in your grin and the shape of your mouth  
All I want is to see you in terrible pain  
Though we won't ever meet I'll remember your name

Can't believe you were once just like anyone else  
Then you grew and became like the devil himself  
Pray to God I can think of a kind thing to say  
But I don't think I can  
So fuck you anyway

You are scum  
You are scum  
And I hope that you know  
That the cracks in your smile are beginning to show  
Now the world needs to see that it's time you should go  
There's no light in your eyes and your brain is too slow

Can't believe you were once just like anyone else  
Then you grew and became like the devil himself  
Pray to God I can think of a kind thing to say  
But I don't think I can  
So fuck you anyway

So fuck you anyway  
So fuck you anyway  
So fuck you anyway  
So fuck you anyway  
So fuck you anyway

Bet you sleep like a child with your thumb in your mouth  
I could creep up beside, put a gun in your mouth  
Makes me sick when I hear all the shit that you say  
So much crap coming out, it must take you all day

There's a space kept in hell with your name on the seat  
With a spike in the chair just to make it complete  
When you look at yourself do you see what I see?  
If you do, why the fuck are you looking at me?

Why the fuck are you looking at me?

Why the fuck  
Why the fuck are you looking at me? [x4]

There's a time for us all and I think yours has been  
Can you please hurry up, 'cause I find you obscene  
I can't wait for the day that you're never around  
When that face isn't here and you rot underground

Can't believe you were once just like anyone else  
Then you grew and became like the devil himself  
Pray to God I can think of a kind thing to say  
But I don't think I can  
So fuck you anyway

So fuck you anyway

So fuck you anyway  
So fuck you anyway  
So fuck you anyway.
