

# Heartbeat

## Plan B

When the whole world's got the wrong idea  
Even though I made myself clear  
In the past  
I've been misunderstood  
And haven't handled it well  
The way I know that I could  
But things are different now  
Since I stopped caring  
I don't worry about  
What people saying  
Cos there's no way that I  
Can stop them thinking  
What they're thinking

I'm just listening to my heartbeat  
To the tune  
I've been singing from the start  
Since I learned the truth  
I gotta make my own decisions  
'Bout what to do  
Can't be changing up the rhythm  
Just for you

When it looks like I've lost my way  
Even though I'm saying I'm okay  
Let me be  
There's nothing no-one can do  
When all odds are stacked against me  
My true colours shine through  
The fog of deception  
That's been clouding your perception  
Of who I am  
I'm ready for rejection  
I'm not begging for acceptance

I'm just listening to my heartbeat  
To the tune  
I've been singing from the start  
Since I learned the truth  
I gotta make my own decisions  
'Bout what to do  
Can't be changing up the rhythm  
Just for you

I'm just listening to my heartbeat  
To the tune  
I've been singing from the start  
Since I learned the truth  
I gotta make my own decisions  
'Bout what to do  
Can't be changing up the rhythm  
Just for you

I did it just to prove 'em wrong  
Cos they said I'd never make anything of myself  
I said I'd do it all along  
Just kept on following my heartbeat and nothing else

I'm just listening to my heartbeat  
To the tune  
I've been singing from the start  
Since I learned the truth  
I gotta make my own decisions  
'Bout what to do  
Can't be changing up the rhythm  
Just for you

I'm just listening to my heartbeat  
To the tune  
I've been singing from the start  
Since I learned the truth  
I gotta make my own decisions  
'Bout what to do  
Can't be changing up the rhythm  
Just for you

I'm just listening to my heartbeat  
I'm just following my heartbeat  
I'm just listening to my heartbeat  
I'm just following my heartbeat
