

Taravana

Plan Three

I'm breathing slow for you love
I will dive straight down for you love
Then come right back up
Wait for the light, wait for the light

Treading on needles
Our thoughts they deceive us
Caught in a glitch
Between what's wrong and right
Takes time to heal
With a mind made of steel
But all this won't be for all eternity

Gotta get up, gotta get up
Air is running low
Figure it out, figure it out
Fast before it blows
Gotta get up
Air is running low
Figure it out, figure it out
Fast before it blows

Who do we bow to?
Figure it out, figure it out
Fast before it blows
What are we here for?
Figure it out, figure it out
Fast before it blows

Chest pain from breathing
This vertigo feeling
The insects come crawling
From under my skin
Lights slowly fade
Now I'm feeling betrayed
And all this will be for all eternity

Gotta get up, gotta get up
Air is running low
Figure it out, figure it out
Fast before it blows
Gotta get up
Air is running low
Figure it out, figure it out
Fast before it blows

I'm breathing slow for you love
I will dive straight down for you love
Then come right back up
Wait for the light, wait for the light

Gotta get up, gotta get up
Air is running low
Figure it out, figure it out
Fast before it blows
Gotta get up
Air is running low

Figure it out, figure it out
Fast before it blows

Who do we bow to?
Figure it out, figure it out
Fast before it blows
What are we here for?
Figure it out, figure it out
Fast before it blows

Who do we bow to?
What are we here for?
