

Where Do We Go from Here

Plan Three

So we're back here again was it ever to end
We're so close to the brink and it's drawing us in
Can you feel us descend this is where we begin
On the verge of a flood and about to fall in

Did you ever get to feel the fall before we crashed down
Did I shatter every bit of you by shutting you out
Will there always be a part of you that dreams of last time
Will there be a last time
I am ready now 'cause

I've been gone too long
Where do we go from here now
I tried to stay gone
Where do we go from here

And the words of the wise those are nothing but lies
Situation is sick but it's catching your eye
And if we're in for the night turn away from the light
There's a classy approach turning bad in your mind

Yeah we never got to feel the fall before we crashed down
Did I shatter every bit of you by telling our lies
Will there always be a part of you that dreams of last time
But it is the last time
And I really feel that

I've been gone too long
Where do we go from here now
I tried to stay gone
Where do we go from here
Where do we go from here
